Seeking a PHP Laravel Developer role to utilize my backend and API development skills.

Professional Experience

PHP Laravel API Developer with **2 years of experience** in building RESTful APIs, CRUD operations, and secure backend systems. Skilled in Laravel Sanctum authentication, database design, and API integration. Currently working at Enirmaan Software Pvt. Ltd., developing and maintaining production-level applications.

Php Laravel Developer

E-Nirmaan Software Solution pvt ltd. Noida

Oct 2024 – Present

- Developed and implemented RESTful APIs using **Laravel 10** for customer management operations.
- Built a secure **authentication and authorization system** using **Laravel Sanctum token-based authentication**.
- Created CRUD APIs for customer management including customer listing, filtering, and payment status updates.
- Developed **CSV bulk upload functionality** with duplicate record validation and data processing.
- Implemented email/WhatsApp notification workflow for pending customer payments.
- Created reporting APIs to generate customer summary reports including paid and pending customer statistics.
- Performed API testing using **Postman** and handled request validation, API responses, and error handling.
- Worked with **MySQL database**, Eloquent ORM, migrations, and Laravel best practices.
- Managed API routes, controllers, middleware, and backend logic following MVC architecture.

Project Summary

HRMS (Human Resource Management System)

- Developed modules including Employee Management, Attendance, Leave Management, Expense Management, and Notifications.
- Implemented secure login, OTP verification, role-based access control, and authorization.
- Created REST APIs with validation, middleware, and proper error handling.
- Designed database relationships using Eloquent ORM and migrations.
- Integrated email notifications for employee workflows and system updates.
- Improved application performance through query optimization and debugging.

Strive – Task Management System

- Developed task management features including task creation, assignment, tracking, and activity logs.
- Built secure APIs with authentication and authorization.
- Implemented notifications for task updates and user activities.
- Designed scalable database structure with optimized queries.
- Worked on frontend integration and backend improvements.

Additional Experience / Skills

Testing & Quality Assurance

- Performed manual testing of web applications and REST APIs.
- Created and executed test cases and test scenarios for application modules.
- Tested CRUD operations, authentication flows, validations, and user workflows.
- Identified, reported, and fixed bugs in coordination with the development team.
- Performed API testing using **Postman** and verified API responses.
- Supported regression testing after new feature implementations.

Technical Skills

- PHP, Laravel Framework, RESTful API Development, CRUD Operations, Authentication, API Integration
- MySQL, Database Design, SQL Queries, Migrations, Eloquent ORM, Relationships
- HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX
- **Development Tools:** Git, GitHub, Postman, Composer
- **Concepts:** MVC Architecture, Routing, Middleware, Validation, Error Handling, Debugging, OOPs
- **Testing Tools:** Manual Testing, Test Case Creation, Bug Reporting, API Testing (Postman), Regression Testing

Education

- B.A., Dr. Ram Manohar Lohia Avadh University, Ayodhya (UP)
